About Inca One:

Inca One Resources Corp. is a publicly listed (TSX-V:IO) mineral resource company focused on acquiring and advancing properties in the South American country of Peru. The Company has the option to acquire a 100% interest in the Las Huaquillas Gold-Copper project in Peru.

Previous exploration on the Project was executed by Cooperacion Minero Peruano - Alemana (1988-1992) and Sulliden Gold Corporation Ltd. (TSX: SUE, “Sulliden”) (1996 - 1999). The exploration consisted of surface geological, geochemical, and geophysical studies, 26 drill holes and 1200 meters of underground workings.

In 1998, Sulliden estimated a 500 meter section of the 2.2 km long Los Socavones Zone hosted an **estimated geological resource of 6.57 million tonnes grading 2.09 g/t Au and 25.2 g/t Ag (equivalent to 443,000 ounces of gold and 5.3 million ounces of silver)**. The resource estimate is based on historical findings and is not NI 43-101 compliant.

The historical estimate used a cut-off of 1.5 g/t gold and remains open at depth and along strike. The historical resource estimate was based on data retrieved from 10 drill holes and 20 mineralized intercepts to a depth of 200 meters.

Note: The historic resource was calculated in 1998 and the Company has not completed the work necessary to have the historical estimate verified by a Qualified Person. The Company is not treating the estimate as a current NI 43-101 defined resource and the historical estimate should not be relied upon. The Project will require considerable future exploration which the Company intends to carry out in due course.
