## **Chala One Produces 111 Ounces of Gold in November**

**Vancouver, B.C., December 12, 2013 – INCA ONE RESOURCES CORP. (TSX-V:IO)** (“Inca One” or the “Company”) wishes to announce production results for the month of November, 2013 at its newly upgraded Chala One gold milling facility located in the Region of Arequipa, Chala, Peru. During this month the mill processed 205 dry metric tons of ore with an average grade of 16.94 g/t Au with recoveries of 92.6% for gold production of 111.5 ounces.

The Company continues to source high-grade ore from artisanal miners in an effort to ramp up to a full 25 TPD capacity in the New Year and intends to then commence plant upgrades to increase capacity to 50 TPD by the 2<sup>nd</sup> quarter of 2014.

Commenting on the above, Mr. Edward Kelly, President and CEO, stated, "Completing the Chala One upgrade and commencing production has been a major focus for Inca One and a stepping stone for further growth. The plant is operating smoothly, is easily scalable and there is an abundance of high-grade gold mill feed to support increasing production in the coming months."

Inca One, practicing North American mining standards, intends to become a “toll milling company of choice” for artisanal miners in Peru.

The Company will provide a more detailed analysis of Chala One production results in its future quarterly filings.

### **About Inca One Resources Corp**

Inca One is a Canadian-based mineral resource company with a newly acquired gold milling facility & exploration assets in Peru, which was home to the Inca Empire. Peru is currently the largest gold producer in South America, hosting mines which have produced up to 26 million ounces of gold. A highly mineral-rich country, Peru is one of the world’s top producers of gold, silver, copper and zinc.
