Notes to the Condensed Interim Consolidated Financial Statements
For the Three and Six Months Ended October 31, 2018 and 2017
(Unaudited - Expressed in US Dollars)

NOTE 1 – NATURE OF OPERATIONS AND GOING CONCERN

Inca One Gold Corp. (formerly Inca One Resources Corp.) (the "Company") was incorporated under the laws of Canada on November 9, 2005 and was continued under the British Columbia Business Corporations Act on November 26, 2010. On September 17, 2014, the Company changed its name from Inca One Resources Corp. to Inca One Gold Corp. The Company's shares are traded on the TSX Venture Exchange (the "TSX-V") under the symbol "IO", on the Frankfurt Stock Exchange under the symbol "SU9.F", and the Santiago Stock Exchange Venture under the symbol "IOCL". The head office and principal address of the Company are located at Suite 850 - 1140 West Pender Street, Vancouver, Canada, V6E 4G1 and its registered office is located at 10th Floor, 595 Howe Street, Vancouver, Canada, V6C 2T5.

Inca One is engaged in the business of developing gold-bearing mineral processing operations in Peru, to service government permitted small scale miners. In recent years the Peruvian government instituted a formalization process for informal miners as part of its efforts to regulate their activities. The Company, through its Peruvian subsidiaries Chala One SAC ("Chala One") and EMC Green Group SA ("EMC") owns two Peruvian mineral processing plants with 450 tonnes per day ("TPD") of processing capacity. The Company's business plan is to source high grade gold mill feed from legally recognized Peruvian artisanal and small scale miners, purchase and process the material, and export gold concentrate or doré.

The Company continues to actively evaluate potential mineral projects, including additional mineral processing operations.

These Condensed Interim Consolidated Financial Statements are prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. For the three months ended October 31, 2018, the Company incurred a net loss of \$1,132,371. As of that date the Company had a deficit of \$26,032,349 and working capital of \$3,010,284. These conditions indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. Management intends to fund operating and administration costs and debt and debt service costs over the year with the proceeds from gold doré sales at the Company's gold ore processing facilities in Peru and where required, from debt and equity financing and proceeds from option and warrant exercises.

The Company's ability to continue as a going concern is dependent upon its ability to generate net income and positive cash flows from its Peruvian ore processing operations and its ability to raise equity capital or debt sufficient to meet current and future obligations.

These Condensed Interim Consolidated Financial Statements do not reflect the adjustments to the carrying values and classifications of assets and liabilities that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Such adjustments could be material.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Presentation

These Condensed Interim Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). The accounting principles adopted are consistent with those of the previous financial year.

These Condensed Interim Consolidated Financial Statements have been prepared using the significant accounting policies and measurement bases summarized below and were approved by the board of directors for issue on December 28, 2018.

(b) Basis of Consolidation

The Condensed Interim Consolidated Financial Statements are presented in US dollars unless otherwise noted and include the accounts of the Company and its wholly owned subsidiaries, Inca One Metals Peru S.A. (“IO Metals”), Dynasty One S.A. (“Dynasty One”), Corizona One S.A.C. (“Corizona One”), Chala One S.A.C. (“Chala One”) and Anthem United Inc. (“Anthem”) which was acquired on August 21, 2018 (note 4).

Control is achieved when the Company is exposed to, or has rights, to variable returns from its involvement with an entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is obtained and continue to be consolidated until the date that such control ceases. Intercompany balances, transactions and unrealized intercompany gains and losses are eliminated upon consolidation. For partially owned subsidiaries, the interest attributable to non-controlling parties is reflected in non-controlling interest.

(c) Use of Estimates and Judgments

The Company’s use of estimates and judgments were presented in note 2 of the audited annual consolidated financial statements for the year ended April 30, 2018.

(d) Foreign Currency Translation

(i) Functional currency and presentation currency

The functional currency of a company is the currency of the primary economic environment in which the company operates. The presentation currency for a company is the currency in which the company chooses to present its financial statements.

Effective May 1, 2018 and in conjunction with the acquisition of Anthem, the Company changed its presentation currency from Canadian dollars to United States dollars which is the currency that most strongly influences the primary operating and capital decisions of the Company.

These condensed interim consolidated financial statements have been prepared in US dollars as if this currency had been the presentation currency since May 1, 2016 and all comparable prior-

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)

period financial statements have been restated to US dollars in accordance with IAS 21 “effect of Changes in Foreign Exchange Rates”. For the purposes of presentation of the comparative financial statements; all assets and liabilities have been converted to US dollars at the rate prevailing at the end of the reporting period. Fixed assets and equity transactions are converted at the date of the transaction or at the average exchange rate for the period depending on the nature of the underlying transaction.

The functional currency of the Canadian company is the Canadian dollar and the functional currency of Dynasty One, Chala One, Corizona One, IO Metals and Anthem is the US dollar.

(ii) Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the date of transaction. Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are included in profit or loss.

(iii) Consolidated entities

The results and financial position of consolidated entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Monetary assets and liabilities are translated at the closing rate at the reporting date;
- Non-monetary assets and equity are translated using the exchange rates at the date of the transaction. Non-monetary items measured at fair value are translated using the exchange rate at the date when the fair value was determined; and
- Income and expenses for each income statement are translated at exchange rates at the dates of the transactions and where appropriate, approximated by the average exchange rates for the period.

(e) Business Combinations

Acquisitions of subsidiaries and businesses are accounted for using the purchase method. The cost of the business combination is measured as the aggregate of the fair values (at the date of exchange) of assets given, liabilities incurred or assumed, and equity instruments issued by the Company in exchange for control of the acquiree. The acquiree’s identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 are recognized at their fair values at the acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5, Non-current Assets Held for Sale and Discontinued Operations, which are recognized and measured at fair value less costs to sell.

Goodwill arising on acquisition is recognized as an asset and initially measured at cost, being the excess of the cost of the business combination and the non-controlling interest over the net fair value of the identifiable assets, liabilities and contingent liabilities recognized. If, after reassessment, the net fair value of the acquiree’s identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination and the non-controlling interest, the excess is recognized immediately in net earnings (loss).

INCA ONE GOLD CORP.

Notes to the Condensed Interim Consolidated Financial Statements
For the Three and Six Months Ended October 31, 2018 and 2017
(Unaudited - Expressed in US Dollars)

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES (continued)**(f) Non-controlling Interest**

Non-controlling interests are recorded at their proportionate share of the fair value of identifiable net assets acquired on initial recognition. Subsequent to the acquisition date, adjustments are made to the carrying amount of the non-controlling interests for the non-controlling interests' share of changes to the subsidiary's equity. In the event a non-controlling interest is represented by a non-participating entity, then the non-controlling interest is not recognized until the entity has the right to receive its share of the subsidiary's net assets.

Changes in the Company's ownership interest in a subsidiary that do not result in a loss of control are recorded as equity transactions. The carrying amount of non-controlling interests is adjusted to reflect the change in the non-controlling interests' relative interest in the subsidiary and the difference to the carrying amount of the non-controlling interests and the Company's share of proceeds received and/or consideration paid is recognized in equity and attributed to the shareholders of the Company.

NOTE 3 – RECENT ACCOUNTING PRONOUNCEMENTS

The Company has not applied the following new standards and amendments to standards that have been issued but are not yet effective:

IFRS 16 - Leases - IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (the lessee and the lessor). Accordingly, from the perspective of the lessee, IFRS 16 eliminates the classification of leases as either operating leases or finance leases that is currently required by IAS 17 Leases and, instead, introduces a single lessee accounting model. From the perspective of the lessor, IFRS 16 substantially carries forward the accounting requirements in IAS 17.

Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and accounts for those two types of leases differently. Management does not expect any material impact as result of the application of this new standard. IFRS 16 is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted.

NOTE 4 – ACQUISITION OF ANTHEM UNITED INC.

On August 21, 2018 the Company completed the acquisition of the 100% ownership of Anthem United Inc. (“Anthem”), which owns a 90.14% interest in the 350 tonnes per day (“TPD”) Koricancha ore processing facility in Peru (“Kori One”), from Equinox Gold Corp. (“Equinox”) for cash and shares totaling approximately CAD\$16.6 million, less any general sales tax credit (IGV tax credit) collected to the benefit of Inca One.

Under the terms of the Purchase Agreement, the Company acquired a 90.14% ownership of Kori One (the “Transaction”) from Equinox and certain minority shareholders and terminated the 3.5% gold stream payable by Kori One for total consideration as follows:

- CAD\$6 million payable by the issuance of 110,050,225 common shares of Inca One (“Inca One Shares”) on completion of the Purchase Agreement at a deemed price of CAD\$0.055 per common share, of which 51,269,708 Inca One Shares were issued to Equinox, 51,269,708 Inca One Shares were issued to SA Targeted Investing Corp. (“SATIC”) in consideration for the termination of the gold stream and the remaining Inca One Shares were issued to certain minority shareholders who held an interest in Kori One.
- CAD\$2.5 million payment to Equinox on the first anniversary of the completion of the Purchase Agreement to be paid in cash or Inca One Shares at the discretion of Inca One, based on the preceding 20-day volume weighted average price of Inca One Shares, subject to Equinox’s ownership of Inca One Shares not exceeding 19.99% of the outstanding Inca One Shares (the “Equinox Ownership Limit”).
- CAD\$2.5 million payment to Equinox on the second anniversary of the completion of the Purchase Agreement to be paid in cash or Inca One Shares at the discretion of Inca One, based on the preceding 20-day volume weighted average price of Inca One Shares, subject to the Equinox Ownership Limit.
- CAD\$1.5 million payment to Equinox in cash on the second anniversary of the completion of the Purchase Agreement.
- CAD\$2.5 million payment to Equinox on the third anniversary of the completion of the Purchase Agreement to be paid in cash or Inca One Shares at the discretion of Inca One, based on the preceding 20-day volume weighted average price of Inca One Shares, subject to the Equinox Ownership Limit.
- Payment in cash to Equinox on or before the third anniversary of the completion of the Purchase Agreement for the difference between the amount of working capital at closing and \$3 million and certain payments related to outstanding value-added taxes receivable by Kori One, subject to receipt. The Company estimates the amount of working capital on closing of approximately \$4.3 million and therefore approximately \$1.3 million estimated payable on the third anniversary.

NOTE 4 – ACQUISITION OF ANTHEM UNITED INC. (continued)

A preliminary allocation of the purchase price at August 21, 2018, based on management's estimates of the relative fair value of assets acquired and liabilities assumed and subject to final adjustments, is as follows:

Total purchase price:	\$
Fair value of shares issued at acquisition	4,221,012
Fair value of promissory notes (note 12)	5,564,602
Fair value of working capital adjustment	907,153
Non-controlling interest	1,095,398
<hr/>	
Total purchase price to allocate	11,788,165
<hr/>	
Estimated fair value of assets acquired and liabilities assumed:	
Cash	1,034,961
Amounts receivable	191,548
VAT receivable	1,934,392
Prepaid income tax	433,245
Prepaid expenses	44,786
Inventory	1,989,689
Property, plant and equipment	7,198,136
Intangible assets (Goodwill)	20,789
Accounts payable and accrued liabilities	(549,640)
Asset retirement and reclamation obligations	(509,741)
<hr/>	
Total net identifiable assets	11,788,165
<hr/>	

The fair value of the Company's common shares issued for the acquisition of Anthem was determined using the closing market price of the Company's shares at August 21, 2018 and fair value of the promissory notes and working capital calculated on a cash flow basis using an 11% discount rate and a foreign exchange rate of 1 CAD = 0.7671.

The Company commenced consolidating Anthem's financial position and results of operations effective August 21, 2018. The Company recognized \$456,411 net loss related to Anthem for the period from August 21, 2018 to October 31, 2018.

As at October 31, 2018, the aggregate transactions costs related to the acquisition of Anthem were approximately \$216,064.

The information disclosed in this note is preliminary and may change upon the final calculation of fair value of the purchase price and the net identifiable assets. Fair values have not been finalized as of the date of these financial statements due to the short time between the Transaction and the date of these financial statements and the limited resources of the Company.

NOTE 9 – LONG TERM RECEIVABLE

As result of the Acquisition of Anthem, the Company acquired the right to claim refunds of prior years' general sales taxes ("Historical IGV") in Peru and totaling approximately \$4.2 million related to the construction of Kori One. The Company has agreed to pay Equinox 50% of any amounts collected less costs to collect, the remainder of which is for the benefit of the Company. The collectability of this Historical IGV is uncertain and therefore has been reflected in the net identifiable assets (note 4) at its estimated fair value.

As at October 31, 2018, the Company estimated the fair value of 50% of the expected cash flows related to the Historical IGV using a discount rate of 11%, at \$385,810 and for which has been classified as long term receivable. The Company is in the process of evaluating the collectability of this Historical IGV.

NOTE 14 – MINERAL NOTES

On December 14, 2015, the Company issued \$50,000 in secured notes, which bear interest at a rate of 12% per annum payable quarterly in arrears. The notes have a 60 months term to maturity at which time the principal balance plus all accrued and unpaid interest will be repaid to the subscriber. The Company retains the right (upon 90 days prior written notice to the affected holder) to redeem the notes in full. Accrued interest of \$1,893 has been included in accounts payable at October 31, 2018.

NOTE 15 – ASSET RETIREMENT PROVISION

The Company's operations are governed by laws and regulations covering the protection of the environment. The Company will implement progressive measures for rehabilitation work to be carried out during the operation, closing and follow-up work upon closing of the gold processing plants; consequently, the Company accounted for its asset retirement obligations for the plants using best estimates of future costs, based on information available at the reporting date. These estimates are subject to change following modifications to laws and regulations or as new information becomes available.

NOTE 18 – COMMITMENTS (continued)Contingent Debenture

In September 2016 the Company completed a comprehensive capital restructuring which involved: (i) negotiating with debt holders to reduce long and short term debt, (ii) a private placement to provide sufficient working capital to ramp-up operations at the Chala Plant; and (iii) consolidating the Company's shares. As result of this restructuring, the Company issued a \$779,309 contingent debenture certificate (the "Contingent Debenture"), which only becomes payable on the date that the Company achieves two production milestones including (i) achieving 300 tonnes per day mineral processing capacity in Peru, and (ii) achieving three months of 200 tonnes per day average daily production. Upon re-instatement, the Contingent Debenture will have a 12% annual interest rate paid quarterly in arrears, twelve month term to maturity, certain early redemption features, and a general security agreement will be issued. If the performance milestones are not achieved before August 31, 2026, the Contingent Debenture will be cancelled.

As at October 31, 2018 the value of the contingent debenture was \$nil. However, the first milestone of 300 tonnes per day mineral processing capacity in Peru was achieved on the acquisition of Anthem.

NOTE 19 – SEGMENTED INFORMATION

All of the Company's operating and capital assets are located in Peru except for \$487,966 (April 30, 2018 \$511,849) of cash and other current assets which are held in Canada.

Segmented information is provided on the basis of geographic segments consistent with the Company's core long-term and operating assets as follows:

NOTE 19 – SEGMENTED INFORMATION (continued)

During the three and six months ended October 31, 2018, the Company received 100% of its metal revenues from two major customers, noting that the Company has business relationships with other customers, and is not dependent on them.

NOTE 20 – FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**(a) Fair Value of Financial Instruments**

As at October 31, 2018, the Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities, promissory notes payable, derivative financial liabilities, secured debentures and mineral notes. Cash and other receivables are designated as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities, promissory notes payable, secured debentures and mineral notes are designated as other financial liabilities, which are measured at amortized cost. Derivative financial liabilities are measured at fair value.

IFRS requires disclosures about the inputs to fair value measurements for financial assets and liabilities recorded at fair value, including their classification within a hierarchy that prioritizes the inputs to fair value measurement.

The three levels of hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and

Level 3 – Inputs for the asset or liability that are not based on observable market data.

As at October 31, 2018, the Company believes that the carrying values of cash, receivables, accounts payable and accrued liabilities, promissory notes payable, deferred revenue, secured debentures and mineral notes approximate their fair values because of their nature and relatively short maturity dates or durations or their interest rates approximate market interest rates. The gold delivery contracts, being a derivative financial liability have been assessed on the fair value hierarchy described above and are classified as Level 2.

(b) Financial Instruments Risk

The Company's financial instruments are exposed in varying degrees to a variety of financial risks. The Board approves and monitors the risk management processes:

(i) Credit risk

Credit risk exposure primarily arises with respect to the Company's cash and receivables. The risk exposure is limited because the Company places its instruments in banks of high credit worthiness within Canada and continuously monitors the collection of receivables.

NOTE 20 – FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

(ii) Liquidity risk

Liquidity risk is the risk that the Company cannot meet its financial obligations as they become due. The Company's approach to managing liquidity is to ensure as far as possible that it will have sufficient liquidity to settle obligations and liabilities when they become due. As at October 31, 2018, the Company had cash of \$1,197,652 (April 30, 2018 - \$266,836) and current working capital of \$3,010,284 (April 30, 2018 - \$ 776,225) with total liabilities of \$13,780,018 (April 30, 2018 - \$6,273,899).

A summary of the Company's future operating commitments is presented in note 18.

(iii) Market risk

a. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company invests cash in guaranteed investment certificates at fixed or floating interest rates in order to maintain liquidity while achieving a satisfactory return for shareholders. A change of 100 basis points in the interest rates would not be material to the financial statements. At October 31, 2018, the Company had no variable rate debt.

b. Foreign currency risk

Foreign exchange risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of the changes in the foreign exchange rates. The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates associated with the fluctuations in its Canadian dollar and the Peruvian New Sol ("Sol") bank accounts as well as the translation of foreign held assets and liabilities at current exchange rates.

The Company's net exposure to the Canadian dollar and Sol on financial instruments, in US dollar equivalents, is as follows:

Assuming all other variables constant, an increase or a decrease of 10% of the Canadian dollar against the US dollar, as of October 31, 2018 would have changed the Company's net loss by approximately \$265,822. Assuming all other variables constant, an increase or a decrease of 10% of the Peruvian sol against the US dollar, as of October 31, 2018 would have changed the Company's net loss by approximately \$209,954.

The Company had no hedging agreements in place with respect to foreign exchange rates.

c. Commodity price risk

Commodity price risk is the risk of financial loss resulting from movements in the price of the Company's commodity inputs and outputs. The Company's price risk relates primarily to: the spot price of gold for its deferred revenue financial liability balance and future gold price expectations as it relates to sales revenues. The Company continuously monitors precious metal trading prices as they are included in projections prepared to determine its future strategy.

NOTE 21 – CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can provide returns for shareholders and benefits for other stakeholders. The management of the capital structure is based on the funds available to the Company in order to support the acquisition, exploration and development of mineral properties and to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities, issue debt instruments or return capital to its shareholders.

NOTE 21 – CAPITAL MANAGEMENT (continued)

The Company considers its current capital structure to consist of secured debentures of \$1,463,757 (April 30, 2018 - \$1,483,889), promissory notes of \$ 6,605,237 (April 30 2018 - \$nil) and shareholders' equity of \$6,258,994 (April 30, 2018 - \$3,194,197). The Company's ability to generate sufficient funds to service its debts and to provide funding for future operations are dependent on restructuring its secured debentures and raising additional funds to achieve projected future proceeds from mineral processing operations. Notwithstanding these proceeds the Company expects to continue to be dependent on its capital resources which are largely determined by the strength of the junior resource markets, by the status of the Company's projects in relation to these markets and by its ability to compete for investor support of its projects. The Company is not subject to externally imposed capital requirements.

The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to facilitate the management of capital and the further operation of its Peruvian ore processing operations the Company prepares expenditure budgets which are updated as necessary and are reviewed and approved by the Company's Board of Directors.
